

INDUSTRY

Aviation

This complex industry ranges from aviation and aerospace service companies to airlines, charter companies, private operators, manufacturers, aircraft leasing companies and other financial institutions, airports, and governmental agencies.

It's an industry where you want specialists with aviation expertise, access to an experienced multijurisdictional team, and experts on the ground in the places you do business.

Squared lawyers know the aviation industry. Working together, you get all the skills our lawyers have developed representing leading airlines, manufacturers, aviation service providers, airport developers, lessors, financiers, insurers and regulatory bodies. So wherever you fit within the aviation industry, Squared can help.
